# Badminton Country Mix

This quality coarse mix is suitable for cattle, sheep, goats and deer, so is ideal for mixed farms or small holdings when the convenience of one good quality diet is of paramount importance.

## Features and Benefits

**Oil 3% Protein 16% Fibre 9%**

- Cereals and pulses are micronized before inclusion to improve nutrient uptake, digestibility and the performance of the diet.
- Full inclusion of vitamins and minerals.
- No added copper.
- Fully traceable natural wholesome ingredients.

## Feeding Guide

- Cattle: Depending on the time of year and quality/quantity of grass available, a dairy cow will need about 1.5kg of Country Mix for every gallon of milk they are producing.
- Sheep: Typical feed rates are 0.5-1kg/day, but feed needs of different breeds vary; farmers need to adjust accordingly.
- Goats: Forage should form the basis of a goat's diet but feed 0.5-1kg/day to maintain condition.
- Deer: Feed as required in conjunction with grass, conserved forages or fodder crops at typically 0.5-1kg/day.
