

Pedigree Sheep Mix

- High quality, highly palatable mix.
- Special mineral inclusion for winter housed rams and ram lambs.
- Ideal for sheep of all ages.

The natural way to feed today

Badminton Pedigree Sheep Mix has been designed to meet the growing, conditioning and breeding requirements of all ages of sheep.

It is ideal for ewes and lambs, both as a general feed and as a highly palatable creep feed. There is also a special mineral inclusion to help prevent urinary calculi and copper toxicity in winter housed rams and ram lambs.

Feeding Recommendations

Lambs	Introduce carefully as soon as they show an interest, to a maximum of 0.5kg/day.
Adult sheep	0.5-0.75kg/day
In-lamb and lactating ewes	0.5-1.25kg/day
Rams and ram lambs	Up to 1.5kg/day

Always feed in conjunction with good quality forage and ensure plenty of clean fresh water is always available. The actual quantity of Badminton Pedigree Sheep Mix required will depend on the quality and quantity of forage available.
